WORK EXPERIENCE

Webmaster

August 2023 - Present

ACM Student Chapter,Pccoe

- Spearheaded the development and design of the college techfest website "**Anantya**" utilizing **HTML, CSS, JavaScript, and Bootstrap**, resulting in an engaging and user-friendly interface for participants and visitors..
- Implemented **responsive design** techniques to optimize the website's performance across various devices and screen sizes, resulting in increased accessibility and user engagement during the event
- Collaborated with a diverse team of designers and content creators to seamlessly integrate visually appealing elements and interactive features, ensuring an immersive and user-friendly interface for the Anantya website.

PROJECTS

Social Media MERN STACK web application : Discover a vibrant social media platform built using **Reactjs,Mongodb,Expressjs** where users can effortlessly create accounts, login, and explore a world of connectivity. Engage with friends and fellow users by posting, liking, commenting, and even personalizing your profile with the ability to edit your bio. Experience seamless interaction and the power to share your thoughts and experiences in a dynamic and user-friendly environment.
